MISSION

ADHESIVES BONDING & SEALANTS SHOW - ABS EUROPE 2026 is the only European event dedicated exclusively to the entire supply chain of the adhesives, tapes, glues, bonding, sealants, foam, coatings and films industry, and will represent - with an innovative and specific sector vision - the themes, contents and excellence of a leading market both nationally and internationally.

THE PROTAGONISTS

A clear and valuable project: the meeting/comparison between operators in the field and the world of production, distribution, technicians and end users. The protagonists will also be the sector associations and the primary political and economic institutions. Operators will be able to confront themselves at all levels within an event built exclusively on their needs.

TRADITION AND INNOVATION

ADHESIVES BONDING & SEALANTS SHOW - ABS EUROPE 2026 was born from the strong demand of operators and the reference market to have their own meeting moment necessary to arrive prepared for the challenges of a rapidly evolving market. Precisely for this reason, **ADHESIVES BONDING & SEALANTS SHOW - ABS EUROPE 2026** offers just as many exclusive and innovative elements among which we highlight.

● **GrandPrix Adhesives and Tapes** – A real live contest dedicated to rewarding the best workers in the sector.

- **Award Converter and Distribution** – Through a careful selection process, excellence among producers, converters and distributors will be rewarded.
- **Training and Conferences** – Theme at the heart of the event to which specific workshops and related events will be dedicated.
- **Verticality and network** – the language, the approach and the entire program will be created following the specific characteristics of the operators in the sector with a wide use of shared tools.

THE CONTEXT

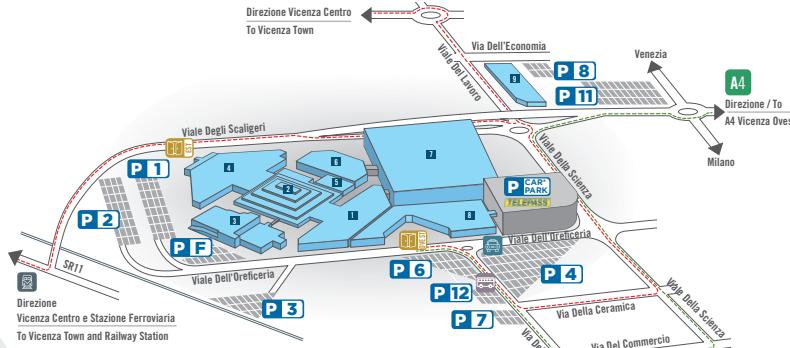

An element of strong innovation is also the choice of location: **Vicenza Expo Centre** in the Veneto Region offers logistical, service and flexibility characteristics that are unique in Italy, making it particularly convenient and easy to access for B2B users both in terms of traffic and hospitality. All in the name of rationality and the correct return on investment.

VICENZA EXPO CENTRE
Viale degli Scaligeri, 13
36100 Vicenza (VI) - Italy

2026 EDITION - FORECAST

- 6,000** VISITORS
- 150** EXHIBITORS
- 20** CONFERENCE SESSIONS
- 29** COUNTRIES
- 70** QUALIFIED SPEAKERS

CO-LOCATED WITH

AUTOMATION & TESTING

A&T is the leading exhibition dedicated to technological solutions, innovation, reliability and 4.0 – 5.0 skills: smart manufacturing, smart logistics, testing and metrology, process control, production control and additive manufacturing. With the same entrance pass, visitors will be allowed to visit the halls dedicated to **ADHESIVES BONDING & SEALANTS - ABS EUROPE 2026** and those dedicated to **A&T 2026**, attend conferences and events organized by the two trade shows.

At the last edition, **A&T** has registered over 12,000 professional visitors.

WHO IS IT FOR

- Converters
- Managers
- Technicians
- Planners
- Plant directors
- Designers
- Engineers
- Consultants
- Installers
- Dealers
- Distributors
- Wholesalers
- Retailers / Department stores
- Spare parts and service centers
- Suppliers
- Traders
- Certification bodies
- Investors
- R&D
- Educational
- Institutions
- Media

ADHESIVES BONDING & SEALANTS 2026

PRODUCT BREAKDOWN

RAW MATERIALS

- Additives
- Adhesion promoters
- Admixtures
- Binders
- Bulking agents
- Chemicals, general
- Encapsulation compounds
- Fillers
- Hardeners
- Monomers
- Pigments and dyes
- Plasticizers and oils
- Polymer dispersions
- Polymers
- Resins
- Solvents
- Tackifiers
- UV curing
- Vulcanizers
- Waxes
- ...other raw materials

PRODUCTS

- Ceramics
- Coatings
- Composite fibers
- Films
- Foam
- Foils
- Gaskets
- Glass
- Glue
- Insulating and shielding materials
- Labels
- Laminates
- Metals
- Natural fibers
- Non-wovens
- Paints
- Paper, coated paper
- Plastics
- Resins
- Rubber
- Sealants

- Seals
- Silicon paper
- Tapes
- Textile
- Tissue
- Varnishes
- VELCRO®, hook-and-loop fasteners
- Web-like materials, other
- Wood

MACHINERY, EQUIPMENT, ACCESSORIES

- Adhesive application systems, general
- Adhesive tape processing machines
- Balances
- Bonding and sealing robots
- Brakes/clutches
- Cleaning systems
- Coating machines and systems
- Consumable materials: cartridges, needles, nozzles, cups and stirrers
- Converting machines and systems
- Conveying machines and systems
- Coolers
- Core cutting machines and systems
- Counting machines and systems
- Curing systems
- Cutting machines and systems
- Die cutting machines and systems
- Dosing and mixing machines and systems
- Drives/automation
- Drying machines and systems
- Embossing/hot foil machines and systems
- Encapsulation technology and systems
- Engineering
- Environmental protection equipment
- Extruders, kneaders
- Extrusion lines
- Filling equipment and systems
- Films manufacturing machines and systems
- Filters and filtration
- Finishing, general machines and systems
- Flexographic/rotogravure machines and systems
- Foolding/creasing machines and systems
- Foam manufacturing machines and systems
- Glue guns / applicators
- Glue manufacturing machines and systems
- Handling equipment
- Hot melt adhesive application machines and systems
- Inspection machines and systems
- Kneading systems
- Knives/blades
- Labelling machines and systems
- Lacquering machines and systems
- Laminating machines and systems
- Laser cutting machines and systems
- Laser plotters
- Laser technology, machines and systems
- Logistics
- Measuring and testing systems
- Metering devices
- Mills and accessories
- Mixers
- Packing/packaging equipment and systems
- Perforating machines and systems
- Pipe systems
- Plasma corona systems
- Pre-treatment systems
- Printing machines and systems
- Production and process control
- Pumps

- Quality control and laboratory testing equipment
- Reels
- Retrofitting/machine upgrades
- Robots/automation
- Rolls
- Safety at work
- Screening equipment and sintering systems
- Shears/shear machines and systems
- Sealants manufacturing machines and systems
- Sealing technology, machines and systems
- Sleeves
- Slitting machines and systems
- Sprayers for applying adhesives
- Static control and contamination removal
- Tape manufacturing machines and systems
- Tinting equipment and systems
- Tools and mould making
- UV sources
- Vacuum coating machines and systems
- Washing equipment
- Waste removal/recycling
- Winding/unwinding machines and systems
- Work clothing (miscellaneous machines, systems and accessories)
